The multi-purpose carrier with
63% more storage.

Big Boy
MULTI-FUNCTIONAL LID

Use it as a...
top-loader, cooler, or server!

2 YEAR WARRANTY

Lightweight
EPP is an engineered plastic foam material that is remarkably lightweight and useful in a wide variety of applications where weight reduction is desired.

Cleanable
EPP is chemically inert and unaffected by oil, grease and most chemicals. Also, it does not support microbial growth.

Recyclable
EPP is an environmentally sound, 100% recyclable material. Manufacturing EPP requires no Volatile Organic Compounds (VOCs), chlorofluorocarbon or other environmentally damaging compounds.

Applications
EPP is used across a wide range of industries.
Automotive— lightweight, strength, impact & noise absorption properties (ex. fuel economy, bumpers, seats).
Packaging— impact absorption, lightweight, recyclable.
HVAC— insulation, lightweight, strength, noise absorption.
FOOD TRANSPORT ... *MightyLite Food Transport*

Super Strong
EPP has a very high strength-to-weight ratio and is an excellent energy-absorbing material that can withstand impact without damage.

Insulative
EPP provides effective thermal insulation for applications where food, medical supplies and other temperature sensitive products require protection.

Advanced polymer foam construction— EPP (Expanded Polypropylene)
The unbelievable strength-to-weight ratio and ability to absorb impact make MightyLite carriers perfect for lifting and withstanding the rigors of off-site food transport!

Stacks well with others.

Integrated full-length index features allow for secure stacking during transport or storage. Thoughtful design prohibits sliding in any direction.

Roll with the Mightylite dolly— Heavy-duty, 350 lb. (158kg) capacity dolly to help transport carriers. Also designed to move milk crates.

Dolly safely nests on top of the carrier for secure vehicle transport.
